

ASPIDA

Safety Footwear

**ENGINEERED FOR
SAFE STEPS**

www.aspidaf footwear.com

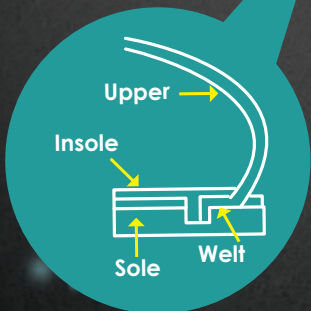

Goodyear welting is the oldest, most labor intensive, and most durable types of methods for shoes construction. The Goodyear welting (patented by Charles Goodyear in the first half of 800) is the perfect combination of craftsmanship and industry.

Goodyear stitching ensures perfect adherence of the insole, sole, welt and upper, giving the shoe a top robustness.

The ASPIDA premium range footwear that features a Goodyear welted construction are built to withstand the toughest working environments. It is precisely this sewing method that makes them so solid, to ensure that the shoes processed according to the Goodyear's technique will last a long time, beyond the normal wear of the sole.

GOODYEAR WELTED CONSTRUCTION

- ✓ Extremely durable
- ✓ High water resistance
- ✓ Molds to your feet
- ✓ Re-solable
