Circus

Powerful magnifier with huge glass lens.

Circus is well suited for demanding work in beauty parlours, clinics and laboratories, or as a tool for people with impaired vision. Circus has a large lens, aluminium head and a highly flexible self-balancing arm and shade neck. The large lens permits comfortable viewing with both eyes.
This excellent magnifier's light source is a circular T5 tube with good colour rendering. A circular light source is the ideal way of illuminating an object, virtually eliminating shadows.

Exact positioning
Circus has a highly flexible self balancing shade neck. The shade neck can be positioned horizontally, vertically and laterally making the luminaire very flexible for most examinations. The fully covered spring balanced arm makes it easy to position the luminaire in the correct position and makes cleaning easy. A hinged sun cover is standard.

Standard version with 3.5 or 5 dioptre lens and table clamp. Arm and body colour: white. Colours of plastic details: Black.

About magnification
Follow this link to read more about the principles of magnification, and how a Luxo magnifier can make a difference for people in many different fields of life.
