PHYSICAL SECURITY
INFORMATION MANAGEMENT

Physical Security Information Management

Unified security operations platform that integrates multiple **unconnected applications** to enable the **automation** and **management** of operations **workflows** and processes, and effective **situation management**.

FEATURES OVERVIEW

- Open for **integration** with multiple security and IoT sensory systems to expand situational awareness beyond what one single silo system can provide.

- **Fuses and correlates** data from disparate devices and systems into **operational information** for action.

- Provides complete situational awareness and control through a **unified user experience**.

- In–built **Standard Operating Procedures** to ensure operators act accordingly to prescribed procedures during a situation, increasing efficiency and minimising errors.

- **Cloud-based** and **hardware-light** for scalability without high implementation cost.

- Designed not to require **VPN** or **Static IP** to connect multiple remote sites.

MODULES

CCTV Surveillance Monitoring System

- Managed and structured monitoring of CCTV surveillance video feeds

- Instructions embedded for video surveillance operators to follow

- Service level agreement engine to configure tangible requirements for CCTV surveillance monitoring

- Fields for video surveillance operators' qualitative inputs

- Audit trails and reporting feature for oversight

MODULES

Event Management Module

- Enable effective **critical event** or **situation** management.

- Automated step–by–step **dynamic** Standard Operating Procedures with related controls for embedded for switch action.

- Quick access to relevant assets and information such as CCTV cameras and location map in one page.

- Fields for operators' qualitative inputs.

- Audit trails and reporting feature for review and oversight.

MODULES

Dashboard

- Visualise and present data in a way that is meaningful to you.

- Dashboard can be customized and designed in single system mode or multiple system mode so that you can view what is critical to you all in one page.
